The two women first started the usual friendly bout. As the argument progressed, the ladies' temper grew to a white heat and finally the 100 or more people who occupy the old building were in an uproar. Sides were taken and for a time a riot looked imminent. As the quarrel progressed, the voices of the Chief Brown Says They Are the Proper Kind for the Southside Hill Wards-Dr. participants rose and fell on the night air. The whole neighborhood was alarmed and the police were notified.

Officer Conners and others were sent hurriedly to the scene of this threatened feminine war. Society was in an awful state. Epithets uncomplimentary were being hurted across the grimy courts.

Indianapolis extended a royal greeting to the victors. He also devoted some time to the wild cat cur-rency plank of the Democratic platform, which, he said, would destroy the best cur-rency in the world. He then took up other questions on which the two parties occupy antagonistic attitudes, the tariff, reci-procity, shipping, etc. He concluded with a glowing tribute to the administration and the able Indiana President.

The Democracy Also Turn, Out in Full Force at Indianapolis. INDIANAPOLIS, Oct. 24.-The Democthey as well as the Republicans were enthused here to-night. Shortly after the Republican procession moved from the eastern end of the city the Democratic parade started from the West End. Such a crowd of speciators had never before been seen in Indianapolis, not even on the night in 1888 when both parties had their great street demonstration. The Republicans had made their meeting a State rally, and the Demo-erats had confined their efforts toward getting out a crowd in the city and county. The tatter had the largest number of men

line, the figures being about 6,000 and S.000 respectively. At 7 o'clock Bourke Cockran, of New York, took the platform at the Grand Opera House. He argued the issues of the enwass from the Democratic point of view, and claimed that the Democratic platform did not portend disaster because it claime! that Republican protection is a fraud and unconstitutional. On this point he said:

We say we believe the Government has no constitutional power to levy taxes except for its own support economically administered. Now, the opposite of that declaration is, that the Government has the constitutional power to levy taxes beyond its own necessities, extravaganily administered, and I would like to know whether a Republican statesman is prepared to defend that proposition.

Mr. Meegan, counsel for Meserz Peck and Rodgers, and Norton Chase for the presecution were present. Mr. Meegan moved that the case be dismissed on the ground that there was an indictment pending in the Court of Sessions for the same charge on which the police court charges are based. Mr. Chase said these cases were not identical. Even if they were, Judge Clute had already held that the two actions could be

continued if they did not interfere with Judge Guttmann replied that as the Disof a similar action now pending in the Court of Sessions, he would dismiss this case. on the question whether the tariff circulars and suswers are public records.

FIRED AND RAN AWAY. Detective Coulson Has Trouble in Finding

a Shooter. Detective Sol Coulson stopped a shoot ing affair last night in Denny's court, off Grant street, that had already begun when he got there, but had as yet resulted in no serious injury to anybody. Pat Ronan and Mike Maloy, neighbors living in the court, got into a quarrel and Ronan pulled out a revolver. Maloy ran, but Ronan shot at him and a ball went whistling through his trouser's leg. The quarrel and shooting attracted a crowd of several hundred peo-

ple as the detective appeared on the scene.
Maloy returned and assisted in the search
for Ronan, who had sought safety in flight. After considerable hunting the fugitive was found hiding in an adjacent cellar, with the revolver in his hand. He was disarmed and sent to the Central station, and Maloy accompanied him.

RAILROADS MAY HAVE TO MOVE TRACKS.

Some of the people who have been encroaching on the Monongahela and Allegheny rivers will receive a rude shock in the United States Court this afternoon. The grand jury has been investigating the streams since last Wednesday, and true bills in 30 cases have been found and will be returned to Judge Buffington to-day. The names were handed to District Attorney Lyon, but he thought it would be im-

proper to make them public before filed in The District Attorney was busy with the Cook Hall cases when the grand jury came into the court room. The jurors had been deliberating all day on the fourth floor. Mr. Lyon stopped long enough to remark to Judge Buffington that true bills had been found in 30 cases for engroachment, and the postoffice tirades in which Cook Hall is the principal witness were resumed. Mr. Lyon said that this was only the beginning of the prosecutions, and wholesale suits against river encroachers

may follow. Making New Harbor Lines. When the Government about two years ago decided to lay out new harbor lines for Pittsburg and Allegheny Mr. Lyon filed bilis against a number of riparian owners to restrain them from filling in the rivers. His idea was not to remedy the encroachments of the past, but to stop them in the future -at least to maintain the present banks of the streams until the Government lines had been drawn. During the last year he has secured injunctions against about 30 people, and the aggressive policy has had its effect on the mill owners and railroads along the rivers. - Mr. Lyon says he has been watching the streams closely, and he is confident

that no filling in has been done since the suits were instituted. What brought the matter prominent before the grand jury now was a bill against George Free, the dumpboat owner. People complained that the garbage from his craft was polluting the river and the odors were very disagreeable. On the strength of these complaints Mr. Lyon filed a bill against Free. When the case came before the grand jury, the jurors evinced a remarkable degree of interest in the subject of river encroachments, and they decided

to investigate all the cases for themselves. The Grand Jury Took a Cruise. Glad to be relieved of further responsi bility, Mr. Lyon hired a boat, and for several days last week the grand jury has been quietly cruising in the local waters. The fact was kept out of the newspapers and few people knew what was going on. The jury, it is understood, collected considerable evidence that won't help the encroachers against whom true bills were found. It didn't take them long to return 20 bills in as many cases. Mr. Lyon, while refusing to give the names, said it would be safe to say that the majority of the de-

fendants will be people whom he has restrained from encroaching on the rivers during the last year. In discussing the cases the United States
District Attorney said: "The prosecution
will be criminal I suppose, and if found
guilty the defendants will be fined and guilty the defendants will be fined and ordered to remove the ground that extends beyond the old harbor lines. The fine is fixed at the discretion of the Court, and if you know how much it costs to take away a cubic foot of earth and had the number of acres to be removed, you could easily figure out the expense. Well, to be short, it will give some people a great deal of trouble. It is surprising how much land has been appropriated along the local rivers. Acres of ground have been stolen from the Allegheny and Monongahela, and

from the Allegheny and Monongahela, and the encroachments can't be laid to one or few men. They are all more or less guilty. Will Temper Justice With Mercy. "The appropriations have been going on so long that it will be difficult to adjust the lines without disturbing vested property rights. I don't think the Secretary of War intends to be hard or radical in laying out the new lines. My impression is that the harbor lines will be established to protect the rivers as they are, and to stop all en-croachments in the future. This will riparian owners down easy. Some of them have appropriated acres of ground that do not belong to them, and it would result in great inconvenience to oust them now. Certainly such a course would be fair, but the Secretary of War, I think, will be inclined to be lenient. There are extenuating circumstances. Back in 1857 the State established high and low water

lines, and manufacturers and others got the idea that they had a right to fill in from their property up to the lines. This gave them a lot of new ground that has since become very valuable." Mr. Lyon's views of the new harbor lines will be pleasant news to encroachers, who were badly trightened some time ago by the statement of United States Engineer John W. Arris to the effect that the lines, when established, would show a great deal of property that had been appropriated, and the owners would have to give it.

the owners would have to give it up. Many Damage Suits Predicted. He predicted that a number of damage suits would follow. In some cases he said entire buildings were beyond the State river lines, and the tracks of the B. & O. and Pemicky roads for half mile stretches at a time are inside the State limits. The statime are inside the State limits. The Secretary of War knows the ground wouldn't be given up without a struggle, and it is reported that he has instructed the engineers not to be too harsh, but in cases where the encroachments are flagrant and interfere with the flow of the streams and navigation that the evil must be corrected

an off-hand way. They Are Old Friends. "Oh, Mr. Frick and I are old friends. I have known him for a number of years. It is private and personal business, I assure you, nothing important."

The pair met with a double hand shake, and then adjourned to the drawing room. The curtains were drawn and the conference commenced. Mr. Frick rode on the train to East Liberty where he got off.

It is well known that campaigns can't be conducted without money, and Mr. Wanamaker enjoys the reputation of being a good maker enjoys the reputation of being a good collector of funds. As the story goes, he is credited with raising \$400,000 for Senator Quay in 1888. It was reported a few days ago, from New York, that B. F. Jones and other wealthy Pittsburgers had loaned the Republican National Committee considerable money to tide it over until more could be gathered. The story was not verified or denied. It is claimed that the Carnegie Company was one of the contributors. negie Company was one of the contributors. Just how much money was loaned can't be learned, but the Carnegie people have al-ways been liberal in Presidental years.

Confident of Republican Success. While at Chicago Mr. Wanamaker had good opportunity to size up the political situation in the West. He talked with a number of politicians and gained considerable information. He is satisfied that New York will go Republican, and he is doing all he can to bring about this result. "In Iudiana," he said. "I think the party is a little weak, but I still believe the State vill be Republican with a small majority. I got my information second-hand from peo-ple who had not been there, but most of them were men whose judgment is good.

If President Harrison could have gone to
Indiana, as he intended, all the difficulfies in the way of success would
inve been removed in a few
days, but he would not leave the bedside of days, but he would not leave the bedside of his sick wife, whom he loves above the Presidency and everything in this world. If Indiana is lost it will be through causes over which we had no control. As for the other Western States, they are all right. Illinois, Michigan, Iowa, Wisconsin, Minne-sota, Kansas and others claimed by the Democrats as doubtful will give President Harrison handsome majorities. I do not believe the people are ready to turn this country over to the Democracy. The administra-tion has been satisfactory, and there is no

reason that voters can see why a change should be made." JOHN DALZELL TO SPEAK.
